FAUSTINI Benjamin

Looking for a job as a Data Scientist

Trained in Stochastic, Statistical Modelling, Data Mining and Machine Learning, i would like to deepen my knowledge in the fields of Big Data and Deep learning. I have excellent team spirit and interpersonal skills, both with the hierarchy and with my colleagues. Autonomous and open-minded, i can be a great addition to your team as a data scientist junior.

Skill

-Machine Learning

-Languages & Software :

Python, Java, SQL, Spark, Scala, Hadoop, C++, Spark

-Organised & Independent

Languages

C2 Native

A2 Notion

B2 Professional

Hobbies

Sport, Wargame, Computer Science, Science Fiction

Education

April June 2022

Certified Java Jee Software Architect
INTI Formation

Mastered the Java J2E language and applied my knowledge to create a web app
Tech stack : springbot, angular
Multiple Web application developed are available on github

2019-2021 Nice

Master in Mathematical Engineering
Nice Côte d'Azur University

1st year: Oriented towards probability, statistics, scientific calculation, computer science, econometrics
2nd year: MSS option: Stochastic and Statistical Modelling
Big Data, machine learning, CART, SCALA, estimator or model selection for risk management and financial analysis.

Projects: (Available on Github)
Dream Challenge project (PFE): From a database on molecules, the goal is to elaborated an algorithm transcribing the olfactory sensations caused by these molecules on a human. (Python)
Insect Challenge Project: From a dataset of 75000 insect images, this kaggle challenge aims to build the best model to classify the 102 different species (Python)
Mnist NN: From the Mnist database, project aiming to study the curves composing the handwriting of Arabic numerals and to instantiate a neural network allowing to recognize them. (Python)
ChatBot: Project to study a model who can have a conversation with a human. (Python)
Ficher project: Stochastic project on the first studies linking tobacco to cancer and analysis of their results. (R)

2019 Nice

Bachelor in Mathematics
Nice Côte d'Azur University

Acquisition of in-depth knowledge in mathematics (algebra, analysis, geometry, differential and integral calculations, probability and statistics, finance) and computer science.

Nice

Scientific Baccalaureate diploma
Lycee Masséna

Professional Experience

March August 2021 Sophia Antipolis

Internship at Orange Innovation

Within the EboxIA project of Orange. Study on Machine Leaning and Deep Learning C++ framework as well as the best python to C++ translators and a test phase in order to make embedded algorithms. (Python/C++/Docker)

September 2018 Nice

Teaching assistant for the pre-entry period 2018

In charge of helping and controlling the PT of 2 groups of L1 (all scientific degrees) during the 2 weeks of the pre-entry of the University of Nice.

Since 2016

Private Mathematics Course

Private tuition for secondary school pupils and students.
